
STEP 1: Connect Your Data

1. Open Tableau Desktop
 2. Click "**Connect to Data**" → **Text File**
 3. Select your file **Chocolate_Sales.csv**
 4. In the **Data Source** tab, check the preview — you should see all 6 columns:
 - Sales Person, Country, Product, Date, Amount, Boxes Shipped
 5. Check that **Date** is recognized as a date (calendar icon), **Amount** as a number, **Boxes Shipped** as a number
 - If Amount shows as string (Abc), right-click the column → **Change Data Type** → **Number (decimal)**
-

STEP 2: Clean Amount Field (Important!)

Since your Amount column has \$ signs:

1. In the Data Source tab, click on the **Amount** column dropdown
2. Select "**Create Calculated Field**"
3. Name it **Revenue**
4. Formula:

`FLOAT(REPLACE(REPLACE([Amount], "$", ""), ", ", ""))`

5. Click OK — use **Revenue** instead of Amount in all your sheets
-

SHEET 1 — Total Revenue KPI Card

1. Click the "**Sheet 1**" tab at the bottom → rename it **KPI - Revenue**
 2. Drag **Revenue** (your calculated field) to the **Text** shelf (Marks card)
 3. Click the **SUM(Revenue)** pill → **Format** → Number → Currency, 2 decimal places
 4. Change Mark type to **Text**
 5. This shows your total: **\$19.8M**
 6. Customize font size to make it large and bold
-

SHEET 2 — Total Boxes Shipped KPI

1. New sheet → rename **KPI - Boxes**
2. Drag **Boxes Shipped** to the **Text** shelf
3. Mark type → **Text**
4. Format as Number → displays **540,437**

SHEET 3 — Monthly Revenue Trend (Line Chart)

1. New sheet → rename **Monthly Revenue Trend**
 2. Drag **Date** to **Columns** shelf
 - Click the **Date pill** → select **Month** (continuous, not discrete) — choose the second "Month" option that shows as green
 3. Drag **Revenue** to **Rows** shelf
 4. Tableau auto-creates a **line chart** ✓
 5. To add year color:
 - Drag **Date** again → drop on **Color** shelf → select **Year**
 6. Right-click Y-axis → **Format** → Currency
 7. Add a **trend line**: Analytics pane → drag **Trend Line** onto the chart
-

SHEET 4 — Revenue by Country (Bar Chart)

1. New sheet → rename **Revenue by Country**
 2. Drag **Country** to **Rows**
 3. Drag **Revenue** to **Columns**
 4. Tableau creates a horizontal bar chart ✓
 5. Drag **Revenue** also to **Color** shelf → this adds a color gradient
 6. Click **Sort Descending** button on the axis to rank countries
 7. Right-click X-axis → **Format** → Currency
 8. Your order will be: Australia → UK → India → USA → Canada → New Zealand
-

SHEET 5 — Revenue by Product (Bar Chart)

1. New sheet → rename **Revenue by Product**
 2. Drag **Product** to **Rows**
 3. Drag **Revenue** to **Columns**
 4. Click **Sort Descending** to rank products
 5. Drag **Revenue** to **Label** shelf so values show on bars
 6. Right-click → **Format** labels as currency
 7. Top product will be: **Smooth Sliky Salty (\$1.12M)**
-

SHEET 6 — Revenue by Country (Donut / Pie Chart)

1. New sheet → rename **Country Share**
2. Drag **Country** to **Color** shelf
3. Drag **Revenue** to **Angle** shelf
4. In Marks card, change type to **Pie**

5. Drag **Country** to **Label** shelf
 6. Drag **Revenue** to **Label** shelf too (shows value inside each slice)
 7. To make it a **Donut**: Hold Ctrl → drag the **Size** slider to the right slightly, then use a dual axis trick OR just keep as pie
-

SHEET 7 — Top 10 Salespeople (Bar Chart)

1. New sheet → rename **Top Salespeople**
 2. Drag **Sales Person** to **Rows**
 3. Drag **Revenue** to **Columns**
 4. Sort descending
 5. To show only Top 10:
 - Right-click **Sales Person** pill → **Filter** → **Top** tab
 - Select **Top 10 by Revenue (SUM)**
 6. Drag **Revenue** to **Label** shelf
 7. Top seller: **Ches Bonnell (\$1.02M)**
-

SHEET 8 — Boxes Shipped by Country (Bar Chart)

1. New sheet → rename **Boxes by Country**
 2. Drag **Country** to **Columns**
 3. Drag **Boxes Shipped** to **Rows**
 4. Sort descending
 5. Change color: Marks → **Color** → pick a chocolate brown or orange tone
 6. Add labels on top of bars: drag **Boxes Shipped** to **Label**
-

SHEET 9 — Revenue by Country (Map) (Bonus)

1. New sheet → rename **Revenue Map**
 2. Double-click **Country** — Tableau auto-generates a map 
 3. Drag **Revenue** to **Color** shelf
 4. Drag **Revenue** to **Size** shelf (creates bubble map)
 5. Change Mark type to **Map** or **Filled Map**
 6. Color goes from light (low revenue) to dark (high revenue)
-

STEP 3: Build the Dashboard

1. Click the **Dashboard** icon at the bottom (looks like a grid) → **New Dashboard**
2. Rename it **Chocolate Sales Dashboard**
3. Set size: **Fixed Size** → **1200 x 800** (or Automatic for web)

Drag sheets in this layout:

Header: Title + Date Range Text Box			
KPI Rev	KPI Box	Avg/Txn	Top Market
Monthly Revenue Trend (full width)			
Revenue by Product		Country Share Pie	
Top Salespeople		Boxes by Country	

STEP 4: Format the Dashboard

1. **Background color:** Dashboard menu → Format → Shade → pick dark brown or white
2. **Title:** Insert → Text Box → type "🍫 Chocolate Sales Dashboard | 2022–2024"
3. **Remove gridlines** on each sheet: Format → Lines → set to None
4. **Match colors** across sheets — pick one accent color and use it consistently
5. **Remove chart titles** that are redundant — keep only chart-level titles
6. Padding between sheets: click a sheet container → Layout tab → add Inner Padding

STEP 5: Add Interactivity (Filters)

1. Click on your **Country** bar chart on the dashboard
2. Click the **funnel icon** that appears on the top right of the sheet → **Use as Filter**
3. Do the same for **Product** chart
4. Now clicking a country/product will **filter all other charts** automatically 

To add a dropdown filter:

1. Drag **Country** or **Year** to the **Filters shelf** in any sheet
2. Right-click the filter pill → **Show Filter**
3. On dashboard, the filter appears as a dropdown or checkbox list

STEP 6: Save & Share

- **Save locally:** File → Save As → **.twbx** (packaged workbook, includes data)
- **Publish to Tableau Public** (free): Server → Tableau Public → Save to Tableau Public
- **Export as PDF/Image:** File → Print to PDF or Export as Image
